

LCC FLORENCE CENTER &
FACULTY PROFESSIONAL DEVELOPMENT PRESENT:

SUSTAINABILITY: SURVIVING AND THRIVING IN A CHANGING WORLD

Everyone talks about sustainability, but beyond solar panels and recycling, what does that mean? LCC faculty member Margaret Robertson, author of *Sustainability Principles and Practice* (Routledge, 2014), offers an overview of this broad and diverse field. Themes include a view of the biosphere as the “instruction manual” on which all sustainability work is modeled, connections between the human sphere and the biosphere, and the possibilities for a regenerative future in a healthy and sustainable world.
