

## Multi-Term Strategic Plan Implementing Recommendations from AHEAD Program Review

September 2018 Updated June 2020

## **Executive Summary**

The Center for Accessible Resources (CAR) hosted an Association on Higher Education and Disability (AHEAD) evaluator, Tom Thompson, On February 12<sup>th</sup> and 13<sup>th</sup>, 2018. During his visit, Tom met with a variety of different groups to gain an understanding of how CAR operates and the services they provide. Tom met with all CAR staff, as well as other departments on campus (IT, Facilities, Deans and Directors, and the Vice President's office). There were also 2 forums each hosted for LCC faculty and students.

At the end of his visit, Tom outlined several strengths, as well as recommendations for the department. This report serves as the multi-term strategic plan to implement these recommendations, as well as progress that has already been made by the department.

## **Specific Priority Recommendations from the AHEAD Evaluation**

- CAR needs the resources and expertise of full time professionals in key roles: Accommodation Specialists, Testing Coordinator, Alternate Format/Assistive Technology Specialist, and the Front Desk.
- 2. The Accommodation Specialist position descriptions should be upgraded to require at least a bachelor's degree, along with commensurate pay. Nationally almost all Disability Resource Services personnel in this role hold a B.A or an M.A.
- 3. The Associate Dean and the Project Coordinator (who functions like an Assistant Director) need to allocate time to doing more collaborative and educational work on campus with faculty, academic administrators, and with heads of key departments including IT and Facilities. It may appear (due to LCC classifications) that CAR has many administrative support personnel, however there are key positions with disability resources that are different from general office support, (i.e. Testing, Alternate Format). These are often B.A. level professional roles in other colleges.
- 4. CAR staff should organize more "listen and learn" problem solving sessions with selected faculty to discuss the procedures and communication necessary to ensure that elevated/complex accommodations are appropriate and do not constitute a fundamental alteration of academic learning objectives and performance skills.

- 5. The ADA Committee should expand its focus and goals to include an institutional review of digital communications, policy/procedures, and curricular access challenges. This will require strong, goal-driven leadership.
- 6. A few students who sought support in dealing with issues related to access and accommodations noted that the complaint and resolution process was confusing and not effective. A review of the submission process, explanation of steps and timelines, and the resolution/findings along with a means to appeal is needed. In addition, there isn't a description of how the informal complaint process is supposed to work.
- 7. The budget for CAR should be inclusive of personnel funding to support changes in upgraded positions and a growth in full-time personnel, along with access to contingency funding for accommodations (when these costs are higher than anticipated).

## Breakdown of the Above Recommendations, Categorized
